

Audio Timeline Instructions

Installation

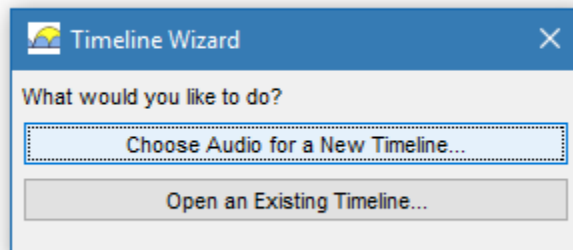

1. Download the free software from <http://tinyurl.com/audiotimeliner>
2. Follow the instructions. (Works on laptops and desktops; does not currently work on tablets).
The software is also installed in the computer lab
3. Contact me with any questions about installation or other bugs

Creating an audio timeline

1. Right click on the audio file provided online and choose “save as” or “save link as” to save the mp3 file to your computer

2. Open Audio Timeliner and click on “Choose Audio for a New Timeline,” then locate your mp3 file

3. When you are done, don't forget to save! Your timeline file has a **.tim extension**. This is the file you should send to the instructor (as an email attachment). No need to send the mp3 file.
4. For further help with the software, see the online help file at <http://www.singanewsong.org/audiotimeliner/Audio%20Timeliner%20Help.pdf>
